Driven Pheasant Tower Shoot

Procedures and Rules

- Shooting grounds consist of 20 shooting positions that are from 75 to 150 yards from the tower.
- Each station is occupied by one or two shooters. (20 minimum - 40 maximum)
- Nine pheasants per shooter are released during the shoot.
- Pheasants are released two at a time.
- Shooting positions are situated to allow only overhead shooting at pheasants that have a flying start of at least 75 yards.
- Most shots are from 40 to 60 yards long. Full choke 12 gauge recommended.
- Shooters rotate after each shooting period. During the shoot each shooter rotates completely around the tower, so everyone has equal opportunity.
- Halfway through the shoot we take a break for refreshments.
- When the shooting is completed, all shooters return to the club house for a barbecue lunch of beef, ribs and sausage.
- All birds are cleaned and divided equally.
- The first six shooters paying a \$75.00 cleanup hunt fee can return after lunch to the tower area to hunt the pheasants that escaped.
- **2006-2007 Price is \$205.00 per Gun**
- **Shoot Starts at 9:00 AM February 10th** (arrive no later than 8:30 AM)

Future Pistol Range Improvements

Check your email for construction closures. The GPGC and GPSDC boards have approved funds to construct a seven yard line and sidewalks as well as two ground ricochet catchers on the pistol range. The existing overhead baffles will be refaced and watersealed. A contractor will place the walks but the other improvements will be done by members.

A schedule has not been made yet but construction should start soon. Anyone desiring to help contact Terry Cullender, 972-264-7889 or tcullender@sradesign.com.
